The Current Threat Landscape: Insight from the Frontlines

Cyberthreats constantly evolve. They react to new technology and shifts in geopolitics. They innovate to stay ahead of defenders. Criminals must stay ahead of their peers in the competitive marketplace. State actors are increasingly leveraged by governments in global intelligence competition. Mandiant has a front row seat to these changes and John Hultquist will illuminate the threats facing his customers from all over the globe.

Bio

Chief Analyst of Mandiant Intelligence, Mandiant, Google Cloud

John Hultquist is Chief Analyst of Mandiant Intelligence at Google Cloud. Prior to the acquisition of iSIGHT Partners by FireEye/Mandiant, John led iSIGHT's cyber espionage practice, where his team uncovered the Russian threat actor best known as Sandworm. He has over 15 years of experience covering emerging threats in cyber espionage and information operations, working in the private sector and the US Government. He is the founder of CYBERWARCON and SLEUTHCON.
